FW-600 LAA

DUAL BAND

FW-600 LAA

SPECTRAL EFFICIENCY, GREATER FLEXIBILITY

The FW-600 is an ultra-high capacity, all integrated multicarrier LTE base station system designed as a response to today's broadband connectivity needs in rural and dense suburban markets. By operating across two different frequency bands, the FW-600 LAA system offers carrier redundancy to users looking for more spectrum.

Using three FW-600 LAA units to pair with BLiNQ's dual band multi-beam antenna, the FW-600 LAA system provides capacity enhancements and focused coverage with high user count that can easily match or out-perform most mMIMO commercial solutions.

Ultra-High Capacity

Ease of Deployment

**CBRS Category B
Certified**

Unique Dual Band Design

THE FW-600 B48/46 DUAL BAND ARCHITECTURE FEATURES:

- 2 sectors with up to 6 carriers per unit in DL across B48 and B46. Each sector contains 3 carrier cells.
- Carriers can be split in multiple configurations across B48 and B46 eg. 2 Carriers B48 + 4 Carriers B46 or 4 Carriers B48 + 2 Carriers B46
- Carrier aggregation is supported in both contiguous and non-contiguous fashion covering the entire band without IBW window restrictions.

eNodeB HIGHLIGHTS

- Delivers close to 1 Gbps Aggregate Throughput per eNodeB
- CBRS Category B certified
- Supports multiple TDD profiles, including TDD Configs 1-7 & 2-7
- Supports Downlink (up to 3CC) Carrier Aggregation
- Provides system capacity of 2 Gbps (when paired with BLiNQ's dual band multi-beam antenna)
